

What is SpoolMaster?

SpoolMaster is an output management solution for IBM System i (AS/400) developed by ROHA Software Support GmbH.

More than 870 installations of this unique output all-rounder are used **worldwide** in various industries and with individual requirements: in Austria, Germany, Switzerland, Spain, Colombia, Mexico, and many more. ROHA's **52 international sales partners** provide first-class support and optimal on-site customer service.

SpoolMaster gets data into shape

Companies have been using IBM i for many years – especially in business-critical areas such as merchandise management. It is still undisputed that this system is high reliable. However, the graphic formatting of data is an essential opportunity for further optimisation of the proven IBM System i (AS/400). If you want to remedy this situation, use the output management solution of the Viennese software development specialist ROHA.

ROHA

Software Support GmbH

ROHA Software Support GmbH was founded in 1997 by Wolfgang M. Roser. The company is one of the leading providers of output management solutions for IBM System i (AS/400).

As a full-service company ROHA develops and distributes the output classic SpoolMaster and provides comprehensive IT services. Due to the quick and easy integration of SpoolMaster into existing ERP systems, ROHA supports all companies that need to process and output spools from their merchandise management system, financial accounting, warehousing, etc. In addition to the company's Vienna headquarters, there is also a subsidiary in Cologne.

For many years, our customers' input has led to maximum output. Requirements grow at least as fast as information, documents and data. An output management solution must be able to keep up with current and future requirements. Thanks to SpoolMaster, our customers keep track of their output jungle at all times and can rely on a user-friendly, flexible, and cost-efficient solution.

SpoolMaster®

The No. 1 output-management solution for IBM System i AS/400

Made in Austria and

available worldwide

MODULAR • FLEXIBLE • RELIABLE

Forward-thinking output management High performance and modern layouts

SpoolMaster easily integrates into your network and provides a comfortable graphic user interface for all functions with the SpoolMaster Navigator.

The IBM System i (AS/400) processes the data entirely at runtime, which is a great advantage for your performance.

SpoolMaster is not limited to data output on printers of various manufacturers. Spool files can also be transferred to PC applications such as Microsoft Office, fax applications, e-mail systems, websites, or archive systems.

Your archive is organised in a low-maintenance and legally compliant manner: SpoolMaster packs content and fonts into PDF/A files and therefore guarantees sustainable availability of all resources in your documents.

Your benefits at a glance

SpoolMaster saves costs

SpoolMaster is a modular, freely scalable system that allows you to choose from a wide range of add-on modules. Adapt your output management solution perfectly to your individual requirements and only pay for functions that you actually need.

SpoolMaster is modular

The many functions of the proven output management solution SpoolMaster for IBM System i are divided into individual modules. Therefore, you get and pay for exactly what you need in your business. Tailor-made and without any unnecessary ballast.

Existing applications remain unchanged

Existing applications in your IT infrastructure remain completely unaffected by the installation and configuration of your new SpoolMaster output management solution.

You can only develop a good product if you know what your customers want. Therefore, a lively and direct exchange with our users is very important to us. It enables us to design SpoolMaster exactly in such a way that it benefits everyone – now and in the future.

Wolfgang M. Roser,
Founder of ROHA

Current developments for and with our clients

SpoolMaster Navigator

The Navigator is the very first graphical user interface for the configuration of a wide range of functions, making it easier to set up and operate SpoolMaster.

eBilling Module

Create XML data streams for electronic billing documents. All common formats such as PEPPOL-UBL, X-bill, ZUGFeRD are supported.

Quick support and maintenance

Short response times ensure swift solutions, especially in critical situations. Daily contact with our users is a valuable exchange of experiences that flows directly into the further development and constant improvement of future releases.
